

Make sure that the input and output file destinations are different.

Input File C:\Users\Dan\Desktop\media1.avi

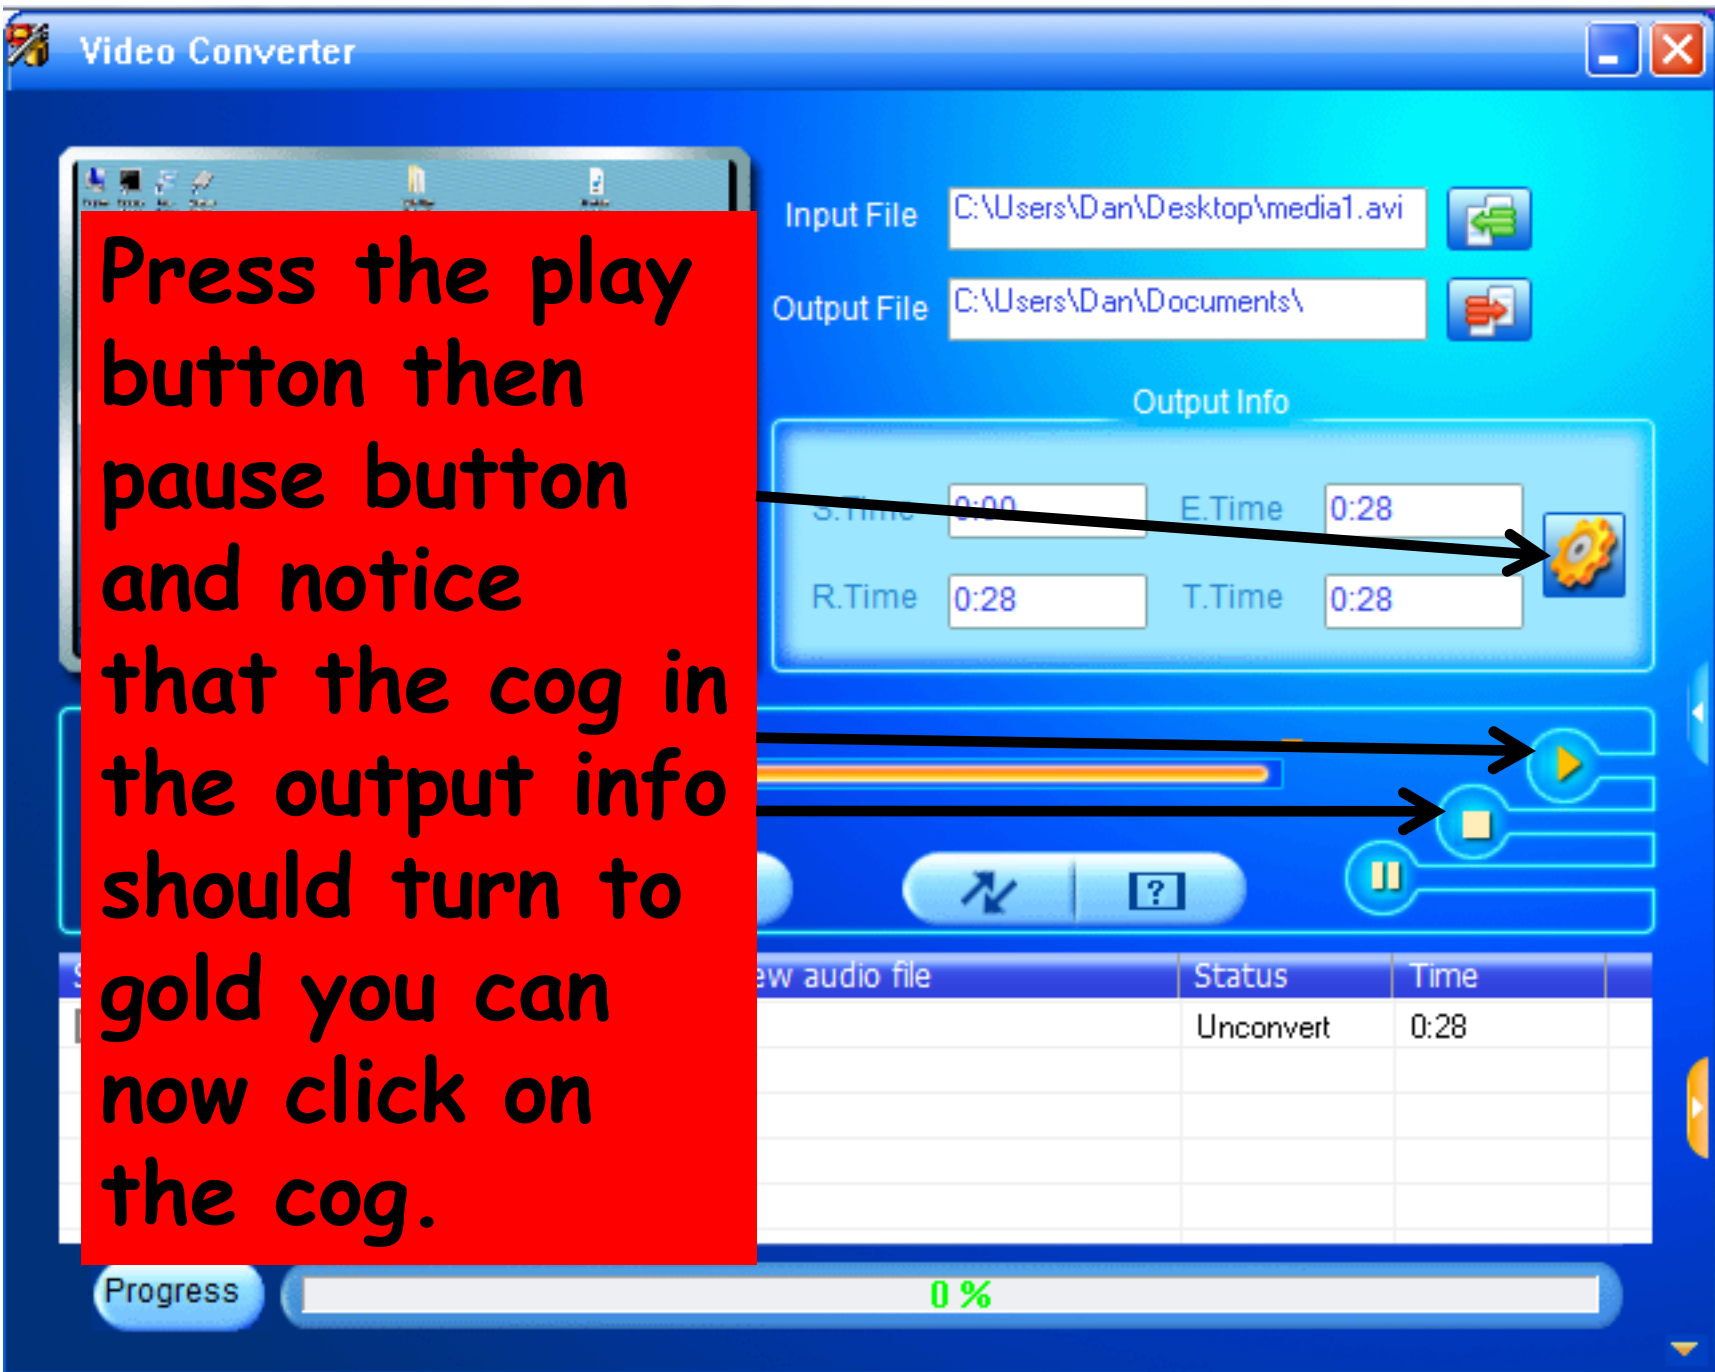

Output File C:\Users\Dan\Documents\

Output Info

S.Time 0:00 E.Time 0:00
R.Time 0:00 T.Time 0:00

Sel...	File name	The new audio file	Status	Time
<input checked="" type="checkbox"/> 0	C:\Users\Dan\Desktop\media1.avi		Unconvert	0:00

Progress 0%

Press the play button then pause button and notice that the cog in the output info should turn to gold you can now click on the cog.

Input File C:\Users\Dan\Desktop\media1.avi
Output File C:\Users\Dan\Documents\

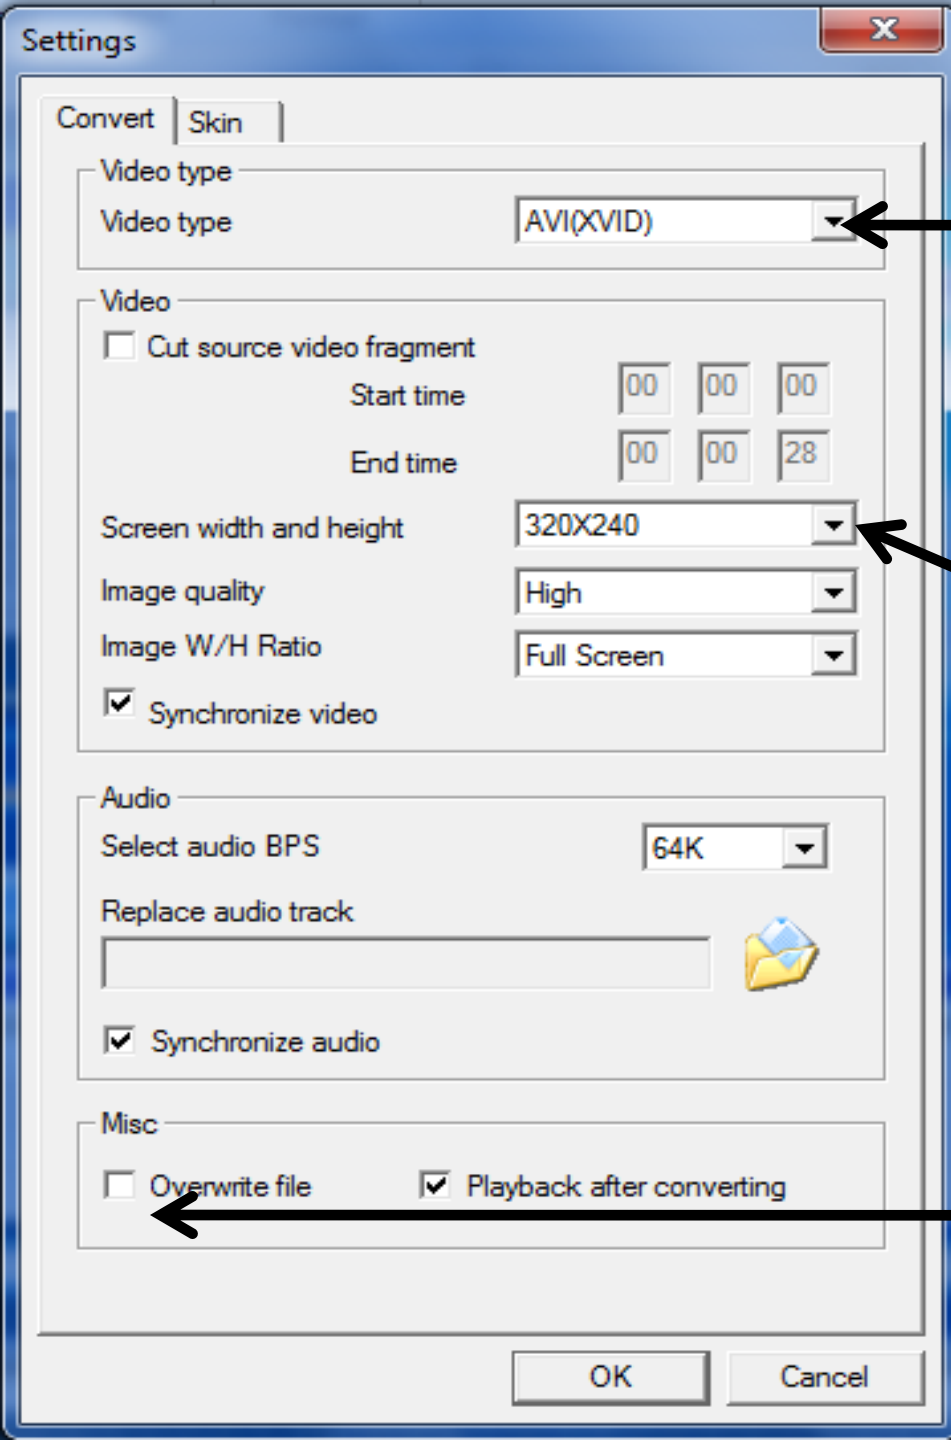

Output Info

S.Time 0:00 E.Time 0:28
R.Time 0:28 T.Time 0:28

Progress bar and playback controls (play, stop, pause, help)

New audio file	Status	Time
	Unconvert	0:28

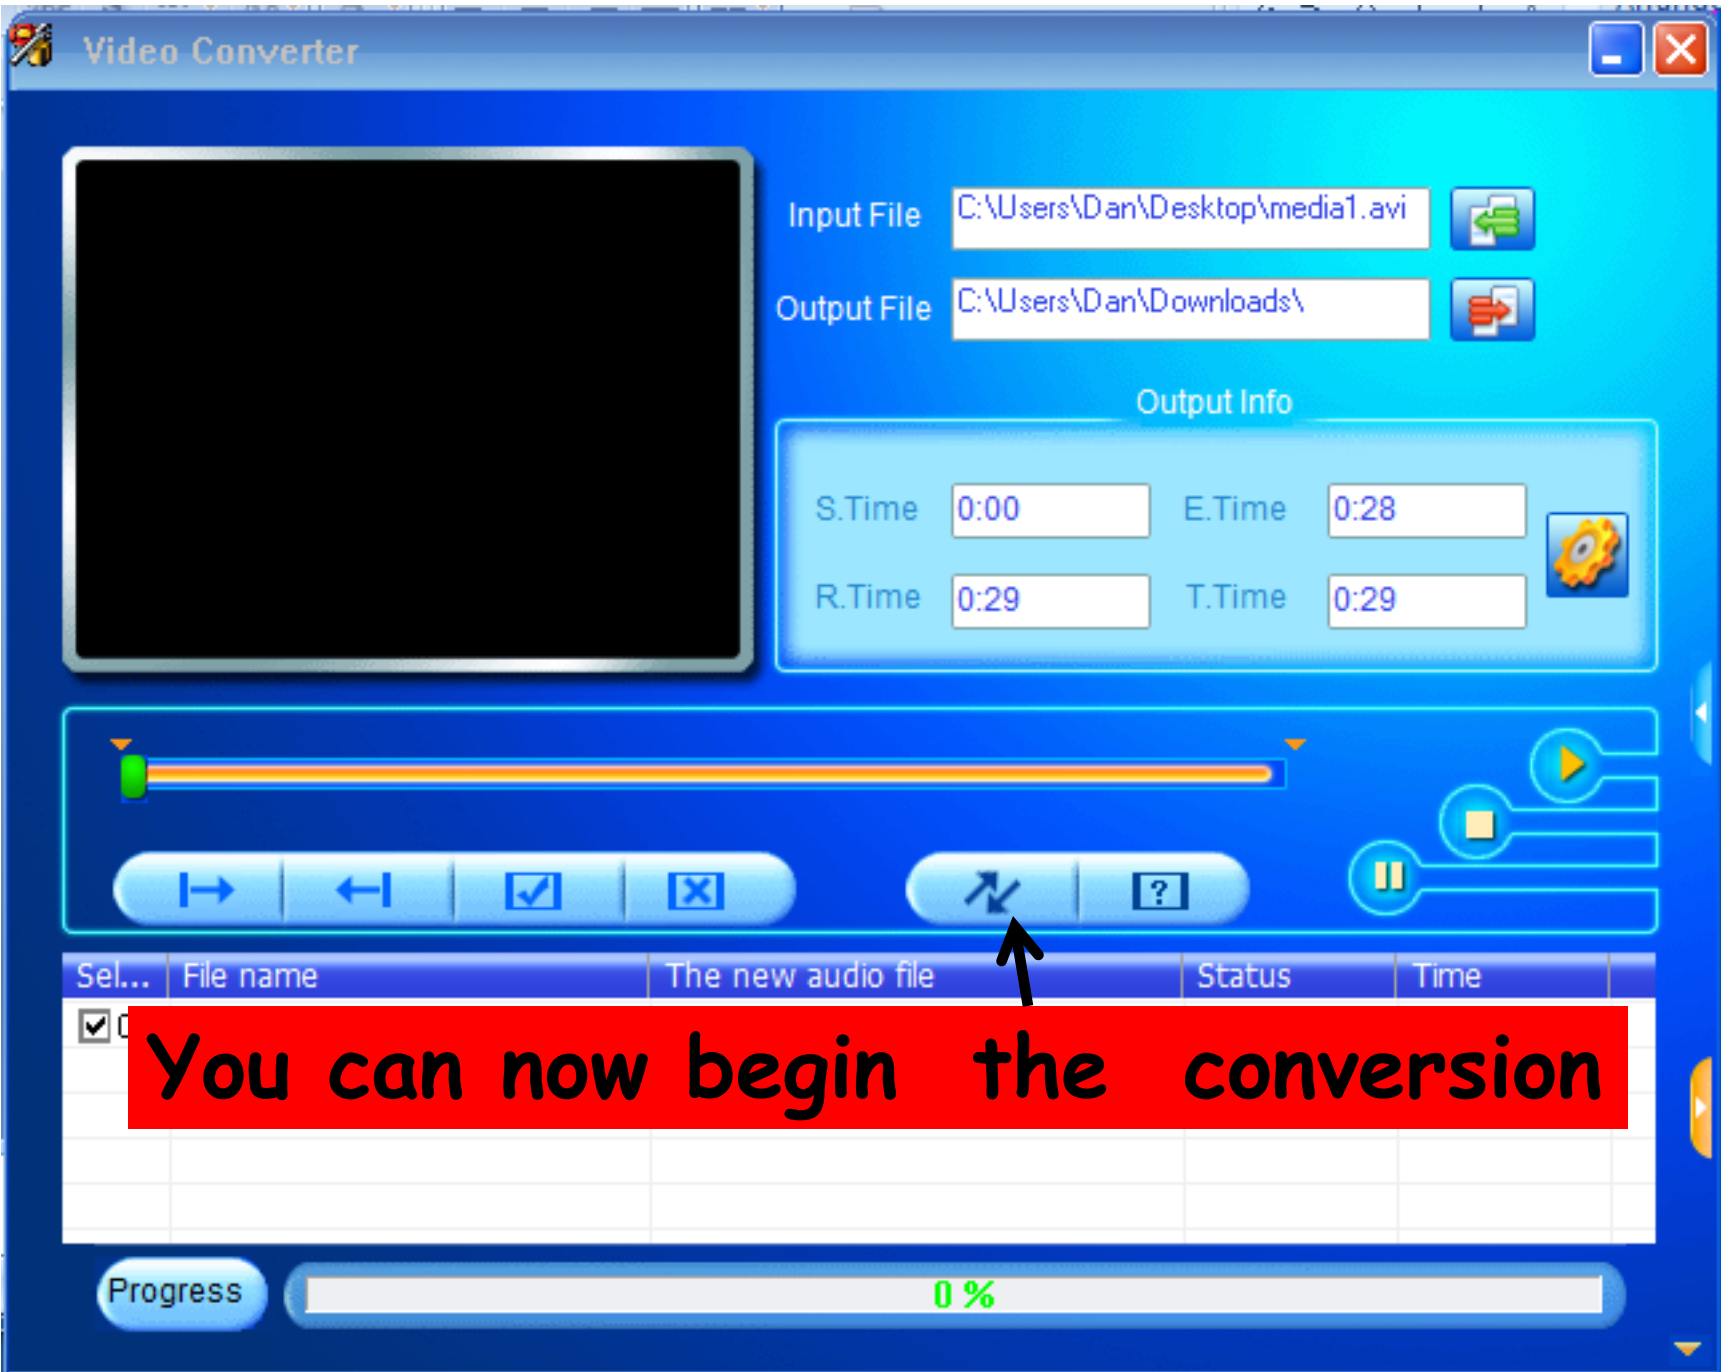

Progress 0 %

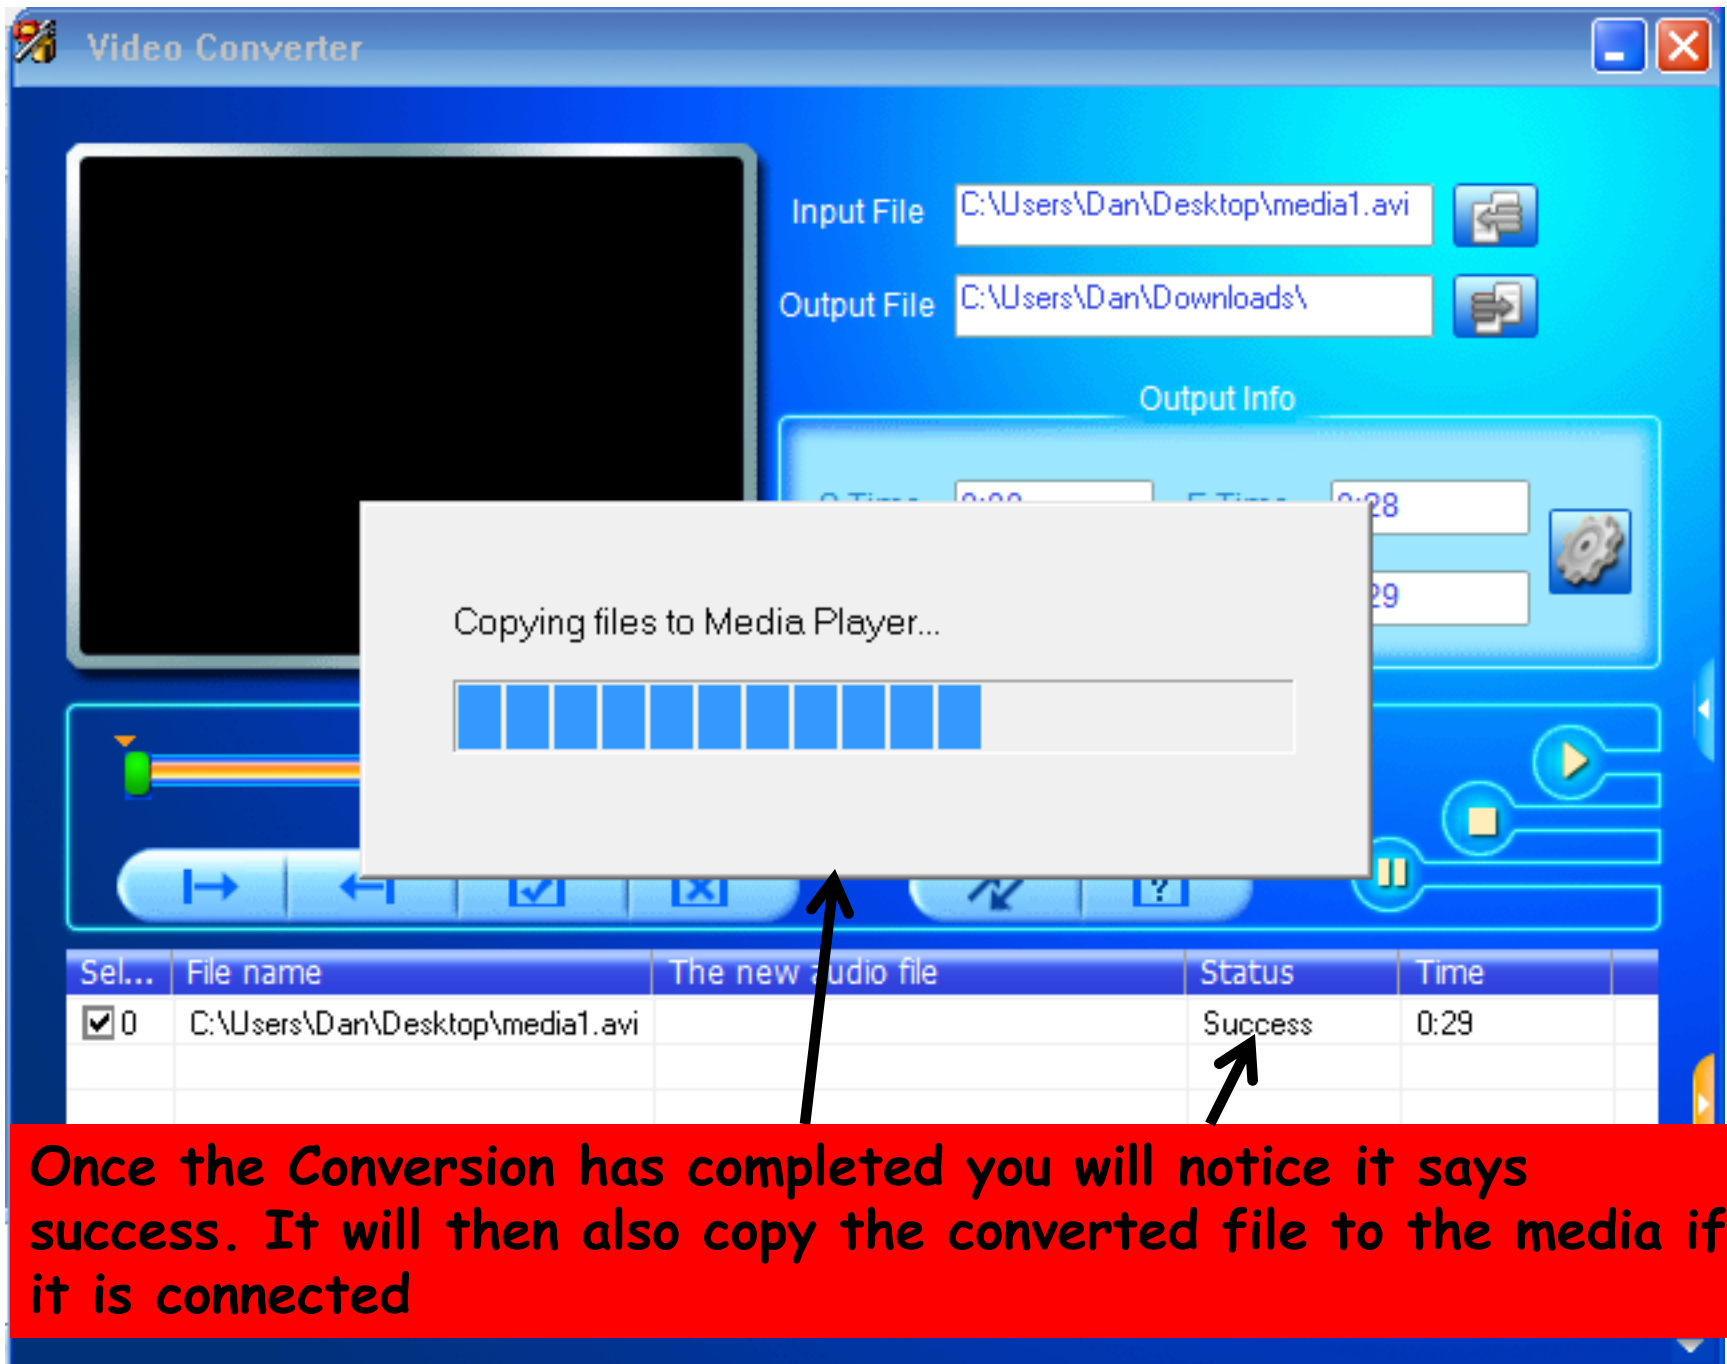

You should now have a settings box that pops up. Make sure the Video type is set to AVI

Make sure that the screen width and height is set to 320X240

Leave the overwrite file box unchecked

Once the Conversion has completed you will notice it says success. It will then also copy the converted file to the media if it is connected
