

### Digital Luggage Scale

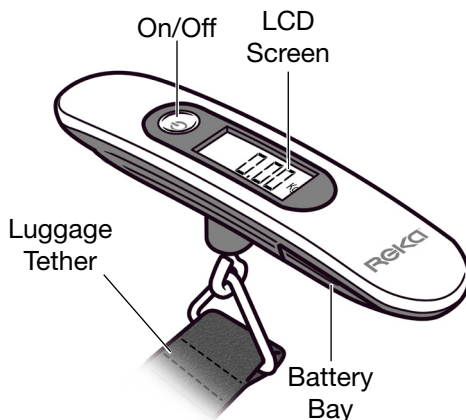

**Model Number: 82975**

#### Contents

- 1 x Digital Luggage Scale
- 1 x Battery (CR2023)

#### Features

- Overload Reminder
- Bright Backlight
- Metric And Imperial Scales
- Maximum Load 40Kg

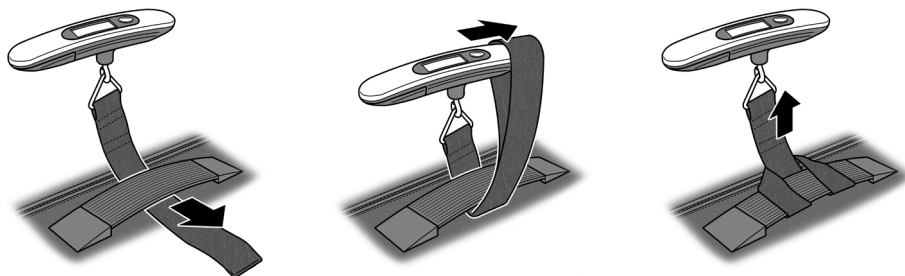

#### Before Use:

Insert the battery to enable the scales.

#### Using The Scales

Thread the tether under the luggage handle. Loop the tether up and thread the scales through it. Pull the scale to secure the luggage handle in place ready for weighing.

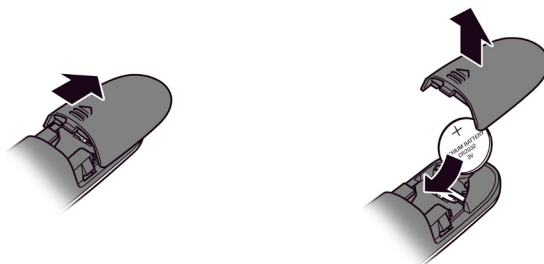

Press the  button to turn on the scales without lifting so the scale zeros itself. Press the  button again to cycle through the available mass scales. Once you have selected which scale to use, lift the luggage that you are weighing by the scale only. Keep the scale as level as possible for a more accurate reading. The screen will flash once and 'HOLD' will show on the screen, hold the luggage for a few more seconds then put it down. The screen will display the value of the mass weighed for a few seconds then returns to zero. Press the  for a few seconds to turn the scales off.

### Digital Luggage Scale

#### Changing The Battery

To change the battery first slide the battery cover back and lift off. The battery is kept in place by a spring contact. Push the battery forward then lift it to remove it from the bay. Insert a replacement CR2032 coin battery with the '+' facing up and replace the cover.
